## 10M X 8MM AIR HOSE

### User Manual

07952

## General Information

**Thank you** for purchasing a BlueSpot product, you can find further information on our range at [www.BlueSpot.uk.com](http://www.BlueSpot.uk.com). Please ensure that you are using the product correctly and that all guidance and cautions are followed in accordance with the instructions. Please retain these instructions for future reference.

## Safe use

Please make sure that you read these instructions carefully in order to avoid injury when using the air hose. Follow all health and safety rules and regulations. If in doubt and available please contact a more knowledgeable source.

### **DO NOT use if damaged.**

- Maintain tool in good and clean condition for best and safest performance.
- Keep the work area clean, uncluttered and ensure there is adequate lighting.
- Maintain correct balance and footing. Ensure the floor is not slippery and wear non-slip shoes.
- Keep children and unauthorised persons away from the work area.
- If the air hose is damaged do not use. If damage is found the air hose should be repaired before use.
- **NEVER** leave the air hose unattended. When you have finished using the air hose it should be stored away in a safe place that is out of reach of children.
- **NEVER** try to get the air hose to perform a task that it was not made for. Do not overload or misuse the tool.
- **ALWAYS** dress appropriately – clothing should be close fitted and long hair tied back. Jewellery should be removed and shoes should be worn with a non-slip sole.
- **ALWAYS** wear the correct eye or face protection when operating the air hose.
- **ALWAYS** wear approved respiratory protection.
- **ALWAYS** ensure you work in a well ventilated room.
- **ALWAYS** ensure the hose does not cause a trip hazard when in use.
- **ALWAYS ensure the correct safety precautions are taken when using compressed air.**
- **ALWAYS** check and ensure all air connections are properly attached and sealed before use.
- **NEVER** operate the tool if you are under the influence of drugs or alcohol as this can be dangerous.
- **DO NOT** operate the air hose if you are tired as this could be dangerous.
- **NEVER** exceed the maximum working pressure (2.0 Mpa / 290 PSI).
- **ALWAYS** check and adhere to national regulations when disposing of the air hose.

## Introduction

The BlueSpot 10m x 8mm Air Hose is manufactured from flexible reinforced rubber hosing which is oil and abrasion resistant and less likely to kink. The hose comes complete with one male and one female 1/4" BSP fitting.

<b>Air Hose Size</b>	10M Long x 8MM Internal
<b>Air Inlet</b>	¼" BSP (6mm)
<b>Air Outlet</b>	¼" BSP (6mm)
<b>Maximum Working Pressure</b>	2.0 Mpa / 290 PSI

## Operation

**ALWAYS** check the air hose for any damage or leaks before using. If damage is found it needs to be repaired before the air hose is used.

1. Refer to the air compressor manual on how to set it up.
2. Attach the air hose to the regulator valve on the air compressor. Always make sure that it is a secure connection.
3. Secure your power tool onto the free connector on the air hose. Make sure the connection is secure and it cannot slide off.
4. Switch your compressor on and begin use. Always ensure you are wearing the correct clothing and PPE equipment whilst using the air hose/compressor. Refer to the air compressor and power tool manuals on how to use.

## Cleaning & Maintenance

**ALWAYS** release any pressure from within the air line and make sure the air hose is fully disconnected before performing any cleaning or maintenance.

Check your air hose for wear and damage by flushing soapy water through it. If any damage or leaks are found they need to be repaired before the air hose is used again.

If the air hose becomes dirty it can be cleaned with soapy water.

## Disposal

Always check and adhere to national regulations when disposing of any tools that are no longer functional and cannot be repaired.

- Contact your local waste disposal authority for information on how to correctly dispose of tools.

## Environmental Protection

Recycle unwanted materials instead of disposing of them as waste. All tools, accessories and packaging should be sorted, taken to a recycling centre and disposed of in a manner which is compatible with the environment. When the product becomes completely unserviceable and requires disposal, drain any fluids (if applicable) into approved containers and dispose of the product and fluids according to local regulations.
