

# HIGH GLOSS BLOCK SEALER

## ENHANCES AND PROTECTS PAVING, PATIOS AND BLOCKS

### PART OF THE DRIVE ALIVE RANGE OF SURFACE TREATMENTS

A ready-to-use colourless, solvent-based liquid for sealing paving, blocks and patios and stabilising sand joints. Once cured leaves the surface with a gloss, clear finish, enhancing the colour of the substrate and providing long lasting protection against oil and water staining.

Simple two-coat application by either brush, roller or squeegee, cures rapidly and will provide a long lasting protective finish.

Deep penetrating properties which will not affect substrates. Can be applied all year round.

Maintains the performance life of substrates and reduces interim maintenance. Lifespan: Dependant on extremes of weather but as a guide the product, once cured, should last at least 2 years under normal weathering conditions.

#### Benefits:

- *Protects against staining of oil and water*
- *Resistant to chipping and peeling*
- *Hard wearing and durable*
- *Long lasting and weather resistant*
- *Unaffected by UV, water or ice*
- *Enhances colour of weathered and new paving*
- *Gloss finish for enriched colour*
- *Resists weed and grass growth between joints.*

#### Specification Summary

Physical Properties	Clear liquid
Application Temperature Range	5 to 30°C
Flammability	Flammable
Abrasion Resistance	Taber wear index 29.8

Code	Colour	Box	Size	Barcode
BDHGBS5	Clear	4	5L	5056437401366
