

# SEAL IT CRACKS & EDGING SEALANT

This is a hybrid polymer sealant, perfect to fill larger gaps and cracks prior to applying the Liquid Membrane. The Liquid Membrane can be applied over the sealant whilst it is still curing, saving you time. Correct use of the sealant will secure edgings and seals around self-terminating flashing or provide extra protection for vents etc.

Can be used if ever needed to repair small tears.

Available in white and gray.

Size 10.5oz
