WEEDKILLER CONCENTRATE

KILLS WEEDS & ROOTS

- TREATS UP TO 32sqm PER SACHET
- EFFECTIVE AGAINST IVY, CUT TREES & STUMPS
- EASY TO USE
- ALLOWS RE-PLANTING

Doff® WeedOut Extra Tough Weedkiller Concentrate MAPP 18335 contains 90g/l glyphosate in a soluble concentrate. A systemic herbicide that kills the foliage and plant roots of unwanted vegetation. Weed control is initially seen as a yellowing of the leaves which die-back after a few days or can take up to 4 weeks after application.

FOR USE ONLY AS AN AMATEUR WEEDKILLER

To avoid risks to human health and the environment, comply with the instructions for use.

READ ALL INSTRUCTIONS BEFORE USE

INSTRUCTIONS FOR USE

Avoid all other spray contact with cultivated plants.

If cultivated plants are treated by mistake, IMMEDIATELY wash off the weedkiller with ample water. Extreme care should be taken to avoid spray drift or spray landing onto lawns and other desired plants as this may damage or kill them. DO NOT USE ON LAWNS. DO NOT USE UNDER POLYTHENE OR GLASS. To avoid possible transfer to lawns or green areas do not walk on treated areas until the spray has dried.

When to use

Apply when the weeds are actively growing and the leaves fully developed. This can occur at any time from Spring to Autumn with the optimum time usually from June to September. Apply at least 8 hours, preferably 24 hours before rainfall for satisfactory results. Do not spray in windy weather. Some tough weeds e.g. willow herb, may need a repeat treatment after 3-4 weeks if re-growth appears. Repeat once only during the growing season. Apply this product carefully. Ensure spraying takes place only when weeds are actively growing (normally March-October) and is confined only to visible weeds, including those in the 30cm swathe covering the kerb edge and road gully — do not overspray drains.

Where to use

Wherever unwanted weeds are to be controlled, including hard surfaces e.g. patios and drives.

How to use

Dosage: Maximum individual dose as a spray: 2.4 ml product per sqm. Garden sprayer: Pour the contents of the 80ml sachet of Doff® WeedOut Extra Tough Weedkiller Concentrate into 800ml of clean water and agitate after dosing. Spray the entire weed especially the leaves when they are dry but avoid excess run-off. Each diluted solution will treat 32sqm. When applying, spray must be directed away from non-target plants.

MIXING

Part-fill the sprayer with clean water. Add the required number of sachets of Doff® WeedOut Extra Tough Weedkiller Concentrate followed by further water to make up to the full volume. Agitate the sprayer after dosing. Use immediately.

CUT TREES AND STUMPS (INCLUDING IVY)

When to use

Treat immediately after cutting the tree or bush ideally from November to March. Do not apply when the sap is rising during Spring/early Summer as control may be poor. A period of at least 8 hours, preferably 24 hours, free of rain is required after application for satisfactory results. If necessary the stump may be covered after application to protect from rainfall.

Where to use

Wherever cut trees and stumps are to be controlled.

How to Use

Dosage: Maximum concentration must not exceed 80ml of product per 20ml of water

Apply 80ml sachet content of Doff® WeedOut Extra Tough Weedkiller Concentrate to 20ml of clean water in a non-metallic container and using a clean paint brush, liberally cover the cut part of the stump especially around the edges to saturation with the prepared solution. 100ml of prepared solution is sufficient to treat 4 cut stumps of 10-15 cm in diameter.

Future Planting

Doff® WeedOut Extra Tough Weedkiller Concentrate has no residual activity in the soil. Planting may take place after the treated vegetation has died back.

Care of Equipment

After use, wash equipment thoroughly with water three times to remove all traces. Dispose of washing water on unplanted, bare ground. Traces of spray left in the equipment may seriously damage or destroy plants sprayed with the same equipment at a later date. Keep children and pets away from treated area until dry.

SAFETY INSTRUCTIONS

Protection during/in use

AVOID ALL CONTACT BY MOUTH. KEEP AWAY FROM FOOD DRINK AND ANIMAL FEEDING STUFFS. WASH OFF SPLASHES IMMEDIATELY. DO NOT BREATHE SPRAY. WASH HANDS AND EXPOSED SKIN AFTER USE. If swallowed seek medical advice immediately and show this container.

Environmental protection

Direct spray away from ponds and other surface water bodies. Do not apply during windy conditions so that spray does not drift onto other plants. Dispose of contents/container in accordance with local authority regulations. Do not contaminate water with the product or its container. Do not empty into drains.

Storage and disposal

KEEP AWAY FROM FOOD AND DRINK. KEEP PRODUCT AWAY FROM CHILDREN AND PETS. KEEP PRODUCT IN ORIGINAL CONTAINER, tightly closed, in a safe place. DO NOT STORE half-used sachets. DISPOSE OF EMPTY CONTAINER IN THE DUSTBIN. PROTECT FROM FROST.

Harmful to aquatic life with long-lasting effects.

Avoid release to the environment.

IF ON SKIN: Wash with plenty of soap and water

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do and continue rinsing.

Collect spillage.

Dispose of contents/container to a household waste recycling centre as hazardous waste except for empty containers which can be disposed of in the dustbin. Contact your local council for details.

To avoid risks to human health and the environment, comply with the instructions for use.
