PATCHES & WORN AREAS

HIGH TRAFFIC AREAS

KIDS PLAY AREAS

DOG PATCH BURNS

use all year round

2.5kg^e

Ideal to use all year round. Do not plant if you're expecting freezing conditions or extreme heat.

What is Doff® 5 in 1 Lawn Fix and how does it work?

Doff® 5 in 1 Lawn Fix contains a proprietary blend of Doff® slow release lawn nutrients which help nurture your lawn in all weather conditions.

A formula blend of 100% peat free lawn soil, professional lawn top dressing and lawn seed. This will help to level bumps and hollows, invigorates growth of existing grass and thickens with the new lawn seed.

This unique lawn formula can be applied directly onto any type of lawn, large or small from late February until early November. This special formulation will aid improvement of soil structure as a top dressing and rejuvenate tired lawns throughout the growing season.

Where can I use Doff® 5 in 1 Lawn Fix?

On existing lawn areas to improve and increase lawn colour and tolerance levels in sun or shady conditions.

High traffic areas where the lawn is worn away. Thinning lawns to help renovate & thicken. Patches and spot repairs caused by pets or children. Sunny or damp areas.

Directions for Use:

Remove all dead grass, weeds and their roots before any application.

Thickening:

If you are trying to thicken a tired lawn or boost an existing lawn, lightly rake the top soil to prepare the thinning lawn area so that the Doff® lawn mixture can blend into surface area, shake pack well before opening and add conservatively to a 1mm depth. Lightly water with a fine spray just to moisten the mixture so that it settles evenly and seed is activated. Apply approximately 75-100g per sq metre.

Restoring & Evening Out Surfaces

If there are any hard lumps or compacted soil surfaces, simply break them up with a rake by scarifying or loosening uneven surface with a fork until consistent crumb is achieved. Shake mixture over the surface area at 1.5mm depth at 150g-200g per sq metre. Rake backwards and forwards to a fine till until mixed evenly and lightly water with a fine spray just to moisten the mixture so that it settles evenly and seed is activated. **Tip:** apply more product to the surrounding areas of the treated area at a thinner rate, this will help patches blend in with the existing lawn better.

Patching

Remove any burnt patches from pet urine by raking away yellow patch and scarify top surface with a rake until surface is broken up evenly. Shake the pack well before opening and evenly apply to a 2mm depth. Lightly water with a fine spray just to moisten the mixture so that it settles evenly and seed is activated. When applying to bare or patch areas apply a little more product around surrounding area so that it can knit into existing grass. Apply approximately 75g per patch of a patch up to 30cm diameter.

APPLICATION RATES

Patch
2.5kg pack will treat over 25 patches of a 30cm diameter, using approximately 75g per patch.

Thickening
2.5kg pack will treat upto 25 sq metre when added at 100g per sq metre.

Restoring & Evening Out Surfaces
2.5kg pack will treat up to 10 sq metre when added at 250g per sq metre.

Small EU 'A' package
Packer ID 7391
Gross Weight: 2.5kg^e - (100% Peat Free Lawn Soil - 500g^e, Top Dressing Mixture 1.5kg^e, Fertiliser NPK 250g^e Magicoat Grass Seed 250g^e)

For amenity use

Batch no:

Packed by date:

COMPOUND FERTILISER UK NPK 9-4-10 + 4 MgO	UK statutory Fertilisers Declaration	ROI statutory Fertilisers Declaration
Nitrogen (N) total	9%	9%
Phosphorus Pentoxide (P ₂ O ₅) total	4% (1.7% P)	1.7%
Phosphorus Pentoxide (P ₂ O ₅) Soluble in Water	2.5% (1.1%P)	1.1%
