Small EU 'A' Package Packer ID: 7391 Seed Mixture for Amenity Use

WHERE SHOULD I USE DOFF® CUT & COVER PATCH FIX?

SHADY AREAS under trees or beneath fences or outbuildings
PATCH FILLING fill in small holes or patches caused by pets or debris.
HIGH TRAFFIC AREAS worn away or yellowing areas, such as walkways or children's play areas.
REVITALISE green up your lawn ready for the new season.

DIRECTIONS FOR USE

FIXING PATCHES

Application rate: 1.2kg pack will treat up to approximately 25 patches of a 30cm diameter using 48g per patch.

Remove any debris, remove all dead grass by raking away and remove any weeds and their roots.

Lightly rake the soil to prepare the patch and break up the compacted soil surface.

Shake the pack well before opening and apply evenly to a 2mm depth.

Water gently to moisten the mixture and activate the seed. Repeat watering action several times at 5 minute intervals. Ensure the treated patch area is kept damp for the first couple of days, if the area dries to a light brown, add more water.

OVERSEEDING

Application rate: 1.2kg pack will treat approximately 10sqm.

Mow the area to be seeded and rake with a lawn rake to remove moss and dead grass.

Water the lawn to make the surface moist and re-rake the top soil so that it is semi-loose.

Shake the pack well before opening and scatter product evenly over the area at a rate of 120g per sqm.

Water gently to moisten the mixture and activate the seed. Repeat watering action several times at 5 minute intervals. Ensure the treated area is kept damp for the first couple of days, if the area dries to a light brown, add more water.

AFTERCARE

Keep the area well watered using a sprinkler or hose with light or fine spray particularly if dry weather follows sowing.

Cut the lawn for the first time when the grass reaches 5-8cm high. At this stage trim lightly and then for the successive cuts gradually lower the mower blades to the ideal cutting height of 25mm. Do not let treated areas dry out.

Mow as required not removing more than one third of the growth at any time.

Continue watering your grass throughout the first year of establishment, to ensure best results.
