Why choose Doff® Lightweight Container & Basket Coco Coir Compost?

Plants thrive in coir compost, making it an excellent choice for gardeners.

Its natural properties make it the ideal growing medium for indoor & outdoor use.

Its advantages are:

Peat-free

Oxygenates roots

Sustainable

Clean

Doff® Lightweight Container & Basket Coco Coir Compost is a premium growing medium with excellent structural stability in both dry and wet conditions. It can absorb moisture at many times its own dry weight while holding vital nutrients in dry or arid spells, helping your plants flourish for longer periods of time.

Doff® Lightweight Container & Basket Coco Coir Compost is peat-free, contains no green waste and is grown from fully sustainable sources. Our eco-friendly 100% peat-free lightweight coir compost is enriched with the necessary nutrients to help your plants flourish. It is reusable, clean and is ideal for indoor or outdoor use.

Directions for use:

- Simply empty what you need into a suitable container.
- Add water - remember that it will expand by up to 3 times.
- Turn over the mixture with your hands or trowel ensuring there are no dry patches.
- Use indoors or outdoors - ensure pots, containers or window boxes have sufficient drainage in the base.
- To expand the full bag up to 15 litres you will need approximately 5 litres of water.
