

XMS (XMS22AVSNIPS)

Milwaukee Metal Aviation Snips, Straight Cut

The Milwaukee Metal Aviation Snips are ideal for short straight cuts, narrow radius cuts and notch cuts. They are made from forged alloy steel (Cr steel) that is chrome plated for increased lifetime, and hardened to 65 HRC. Their serrated cutting edges prevent slippage when cutting. The snips have a compound leverage action, with a torsion spring that opens jaws automatically during cutting for faster cutting action and less fatigue. The handles feature ergonomic and durable overmoulded grips with thumb and forefinger slots for increased comfort. These slots also allow the user to push through sheet metal with ease with less risk of cutting oneself. Specification: Max. Cutting Capacity: Aluminium 1.0mm Stainless Steel 0.6mm Steel 1.0mm.
