BUILDING TRUST

# HEAVY DUTY REPAIR FOR LONG LASTING PROTECTION

Protect with confidence using Black Jack® 903 Bitumen Trowel Mastic and avoid costly damage from leaking surfaces.

When you need a strong solution for repairing cracks and holes, try Black Jack® 903 Bitumen Trowel Mastic. A trowel-applied bituminous compound with added fibres for reinforcement, it remains flexible beneath the surface to allow movement.

- **Fibre-reinforced:** Enhanced durability for bridging cracks and gaps, proving a secure seal.
- **Waterproofing:** Forms a tough surface skin to repel water and prevent ingress.
- **Easy to apply:** No specialist tools required, apply by trowel straight from the tin.
- **Versatile application:** Adheres to many surfaces including asphalt, bitumen felt, iron, lead, concrete, timber, and more.
