

STANLEY® (STA46011)

Dual Colour Quick Square 300mm (12in)

The Stanley Dual Colour Quick Square is made from extra thick ABS plastic that can withstand heavy-duty use. The large base provides a strong grip on materials, and the moulded-in, contrasting colour graduations improve readability. These wrapping graduations ensure greater accuracy. The quick square is a versatile tool and is also ideal for use as a saw guide. Size: 300mm (12in).
