

Vaughan (VAUR20FF)

Steel Eagle Solid Hammer 570g (20oz)

The Vaughan Steel Eagle Hammer has been solid forged and made from high-carbon American steel. Balanced and weighted correctly to improve swing and reduce fatigue. The steel is tapered and drilled at the handle end to improve head weight balance and reduces vibration transfer through the handle. This also provides a secure mounting point for the cushioned grip which is moulded over and through the steel. Tempering of the head and claws of the hammer to fine tolerances ensures that the correct level of hardness is reached while retaining the steels integrity. Made in the USA. The Vaughan 12750 Steel Eagle Solid Hammer has the following specification: Weight: 570g (20oz).

Weight	Head Type	Shaft	Grip
570g (20oz)	Curved Claw	Steel	Cushioned
Face	-	-	-
Smooth	-	-	-
